

Pandora FMS

Affordable SAP monitoring solution

Pandora FMS for SAP

Saves costs with the leading open source solution for System Monitoring.

Pandora FMS has a specific solution to Enterprise Grade Central Monitoring the availability and performance of system environments SAP, as R/3, CRM, SRM, BI, XI, WAS Netweaver, etc.

The solution is based on a remote access to the SAP system, which is connected in time intervals to the SAP kernel to read the points of monitoring. The SAP CCMS infrastructure is common to all the versions and SAP products. Pandora Web Console has an unique screen which summarizes the states of all the SAP environments (R/3 Development, R/3 Quality, R/3 Production) and it manages sending (via e-mail, SMS...) alerts to the support operator.

Thanks to Pandora FMS powerful and flexible architecture there is no need to install any software in the SAP servers, achieving total independence of the platform (operating system and hardware) and saving Property costs, having the Source Code and being able to adapt or improve easily.

The monitors verify the state of the SAP environments in points as:

- System time average response.
- Total concurrent users.
- Use of resources: Memory, blocks, response times of the database.
- Use of the resources for type of Work Process: Dialog, Batch, Update.
- Response Times for functional module (FI, MM, SD, BW) based of the transactions used by the users.

Deset offers consultancy services in SAP projects, Netweaver XI and SAP system interconnection. Deset is a business Partner of Ártica Soluciones Tecnológicas, creators of Pandora FMS.
